## CONVERTIBILITY TABLE OF U.S. SIC TO SIC 1980

## INTRODUCTION

This convertibility table compares the 1977 amended version of the United States Industrial Classification with that of the 1980 Canadian Standard Industrial Classification. The comparison is from the industry class level which is the four digit level of both classifications. When all the commodities or activities of an industry class do not match completely an asterisk will appear next to the SIC code.

Unlike previous tables which were prepared manually this table is an output of the new SIC Database System, which is a merging of the items in both the Canadian and United States Classifications.

For the first time an attempt was made to trace all products or services in both classifications and as a result most classes do not match perfectly. A few cases such as Central Credit Unions in the Canadian classification and Combinations of Real Estate, Loans and Law Offices in the American classification, do not have a counterpart in the others' classification and therefore show no corresponding class title. Activities such as cotton farming, alligator farms or orange groves which do not exist in the Canadian economy could still be fitted into the Canadian classification and have been assigned to a Canadian industry.

Other Standard Industrial Classification convertibility tables available are:

1980 Canadian	to	1970 Canadian
1970 Canadian	to	1980 Canadian
1980 Canadian	to	United States *
1970 Canadian	to	United States *
United States *	to	1970 Canadian
1970 Canadian	to	International
International	to	1970 Canadian
1980 Canadian	to	International
International	to	1980 Canadian

\* This version of the United States Standard Industrial Classification incorporates the amendments to the 1972 SIC which were made in 1977. It should also be noted that this table uses the American short SIC titles.
